**Exact components included in kit vary by application | **NVH = Noise, Vibration, and Harshness*

DENSO

Reliable Stopping Performance

NEW from DENSO! Introducing DENSO First Time Fit® premium brake pad kits – built to the same high standards as the pads that went onto the vehicle when it was made.

Green + Quality + Complete

100% Copper Free *100% Ceramic* *Hardware Kit Included*

DENSO Performs Better:

• 100% Ceramic • 100% Copper-free • Hardware kits included

DENSO First Time Fit premium brake pads are 100% ceramic and tested to perform within the same tolerances established in OE-level manufacturing processes. As a result, DENSO premium brake pads are proven to perform better than our competitors in the categories of noise, vibration, durability, and low rotor wear.

DENSO is exceeding industry standards by only producing brake pad products that comply with the EPA's requirement for reduction of copper content. In doing so, DENSO is helping to reduce toxic heavy metals in the environment and road-runoff, which negatively impacts the health of our streams, rivers, and lakes.
