Software

Digital Twin Software

Promoting process improvement and optimization through equipment simulations in a 3D space.

Digital Twin Software simulates DENSO robots and equipment within a 3D virtual environment. It integrates the "realvirtual.io" software, which is designed for building digital twin spaces, with "Unity," the world's leading 3D development platform. It can help improve and optimize processes, such as verifying layouts without purchasing any actual equipment, training workers, and reducing setup adjustment time.

Overview of digital twin component software

● Unity Industry

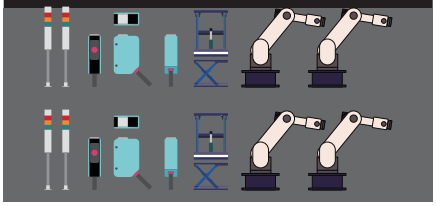

Unity is the world's most popular platform for 3D development. In addition to its use in game development, Unity now provides the "Unity Industry" application for industrial purposes. As a game creation platform, it is highly effective for building digital twin environments, utilizing advanced 3D technologies and physics.

The world's most popular 3D development platform

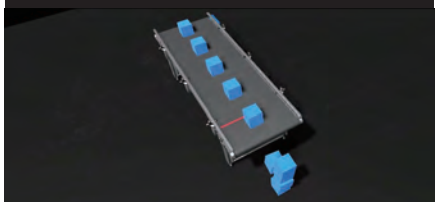

A global development platform for creating games and more.

Rich asset library

A complete collection of resources to improve digital twin environments.

Physics

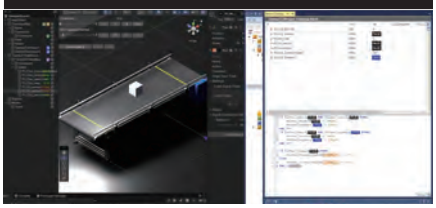

Utilizes the distinctive 3D capabilities that only a game engine can offer.

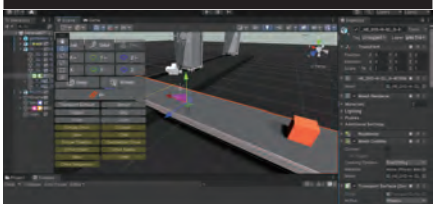

● realvirtual.io-Professional

Realvirtual.io Professional is a Unity add-on that simplifies the creation of equipment design simulations. With its extensive library of assets, including conveyors and motors, you can intuitively build digital twin environments. It also enables easy simulation of equipment with support for TwinCAT and OPC UA interfaces, PLC connections, and software wiring.

TwinCAT interface

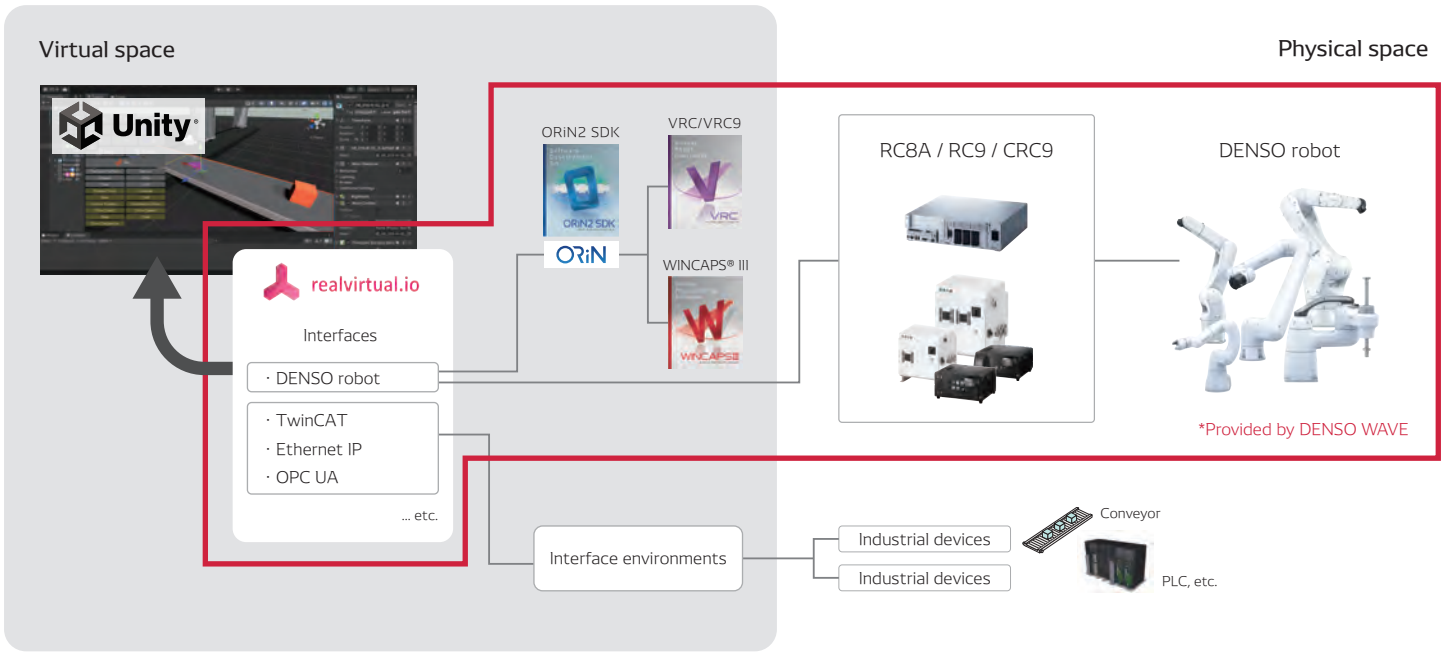

Easy configuration with no need to write source code

Reproduces movement realistically (even gripping and suction)

System configuration

Products

Item	realvirtual.io-Professional	VRC/VRC9	WINCAPS® III	ORiN2 SDK for DENSO products
OS	Windows 7 (SP1+), Windows 10, Windows 11 (64-bit versions only). macOS (Mojave 10.14+ [Intel editor]), macOS (Big Sur 11.0 [Apple silicon Editor]). Linux (Ubuntu 20.04 and Ubuntu 18.04).	Windows® 10 / 11	Windows® 10 / 11	Microsoft Windows® 10 / 11、Windows Server® 2012 R2 / 2016 / 2019 / 2022
PC	X64 architecture with SSE2 instruction set support	CPU: 2 GHz multi-core processor, Memory: 2 GB, HDD: 1 GB or larger	CPU: Pentium® (4) 1.5 GHz, Memory: 512 MB, HDD: 500 MB or larger	-
Supported languages	English	Japanese, English, German, Korean, Chinese	Japanese, English, German, Korean, Chinese	-

*Unity is available for purchase from the official website or a dealer
